

Kaif Imran Shariff

Software Developer

✉ kaif.shariff1234@gmail.com ☎ 7977542667 📍 Thane, India 🌐 LinkedIn 🏠 Github

SUMMARY

Full-stack developer skilled in building and deploying scalable web and mobile apps. Proficient in Flutter, React, Node.js, Express, SQL, and Firebase. Strong in problem-solving, performance optimization, and delivering high-quality results on tight deadlines.

PROFESSIONAL EXPERIENCE

Software Developer Intern

Kodeinnovate Solution

05/2024 – present | Mumbra, India

- Spearheaded the development and successful launch of Delivo, a flagship quick commerce app crafted with **Flutter**. Independently managed the deployment and submission for both the **Play Store** and **App Store**.
- Architected and implemented core features, including **Firebase Authentication** (migrated from SMTP OTP for enhanced security), **real-time** order tracking (Firebase Firestore, **Cloud Messaging**), and **Cashfree payment gateway** integration.
- Engineered a dedicated delivery partner app with **real-time updates**, streamlining order fulfillment and improving delivery efficiency.
- Created an **admin dashboard** for managing orders, delivery partners, and app content, simplifying operations.
- Constructed** a foundational FinTech app (Flutter/Cubit frontend, Node.js/Express/SQL backend) featuring **JWT authentication**, transaction history, **financial goal tracking**, and consultant appointment functionality.
- Formulated multiple responsive websites using **React/React.js and Bootstrap**, including the Delivo website and the S1Media company website, enhancing brand visibility and user engagement. Deployed and managed these sites on Vercel.
- Initiated the creation of the S1Media app, incorporating a WhatsApp inquiry feature and a **content management** admin panel

EDUCATION

BACHELOR IN COMPUTER APPLICATION

Sahyog College of I.T & Management

10/2021 – 04/2024 | Thane, India

CGPA: 8.35
